

FACULTY PUBLICATIONS

1. CONTEXT

The library has for years endeavoured to maintain an **inventory of faculty publications** internally. A year ago, during winter 2015-16, the Library decided to make this list available to all, within and outside AUP, using a free citation tool familiar to lots of scholars, Zotero.

The **Zotero database**, available [here](#), isn't complete yet but we have nearly 600 documents (20dec16) and are steadily going back in time. In order to help the Library keep this list up-to-date, Faculty are more than welcome to send an email to the Library at facultypublications@aup.edu as soon as a publication is out; we will enter it immediately. We follow all faculty active on the academic networks *Academia* and *Research Gate*.

If you were present at the **June 2016 Assessment day**¹, you know that Claudia Roda, ITS, Academic Affairs, Communications, and the Library are looking at ways to centralize faculty publication data entry and make this valuable information available to and reusable by anyone. In the future, we could imagine and hope for an institutional repository.ⁱ Until workflow and solution are finalized, the [Zotero database](#) is available for consultation by all: Faculty, Administrative staff, students, outsiders...

¹ **Note to AUP Faculty:** If you haven't taken the June 2016 survey *Faculty Use of Academic Social Networking Sites & Citation Tools* do take it (2 minutes) [here!](#)

2. USING the Zotero Database

- You can **browse** publications by **date** by selecting one of the date folders. All publications are listed at the root "Library" folder.

- A **"Search" box** lets you perform basic searches through the entire Library

- Faculty can easily produce a **formatted bibliography**, with all or a selection of their publications, in any citation format.

- It is possible to **sort and display more fields** in the list.

- Links to the **full text** are provided when available for free or through one of the Library's subscription database.
